

FOLD N HOLD

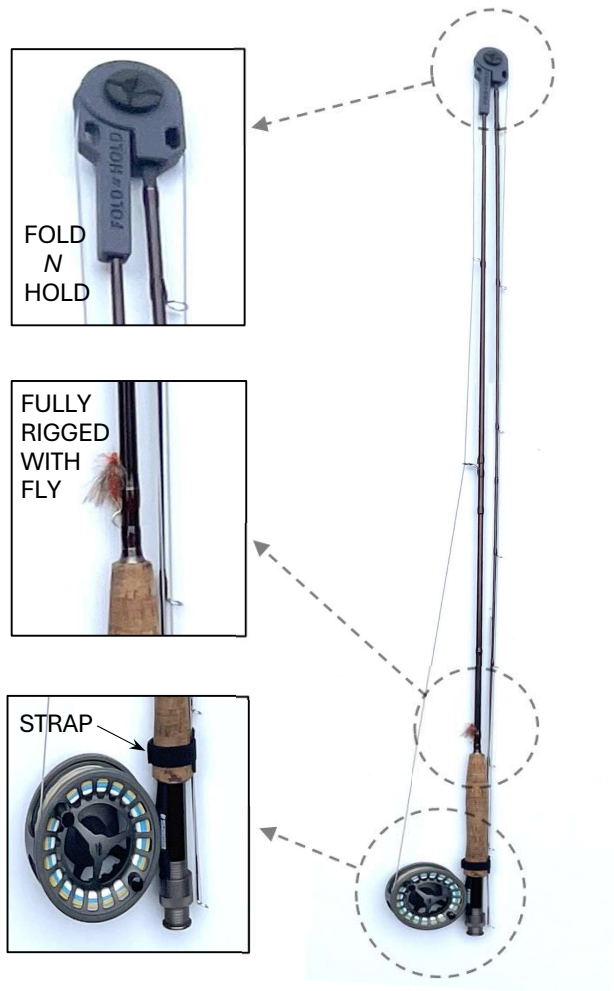

Your Fly Rod's New Best Travel Buddy – safe and simple transport method for your fully rigged fly rod!

The FOLD N HOLD is the easiest way to store and transport your fully rigged fly rod quickly and safely, so that you don't have to cut off the fly and break down your rod every time you get back in the car or bushwack to your next spot.

The **FOLD N HOLD** is 3-D printed and assembled in the Pacific Northwest, using carbon fiber reinforced composite materials (PETG-CF) for strength and durability.

The **FOLD N HOLD** works best on fully rigged fly rods between 3 and 7-weight with included replaceable tips (includes 2 tips for 3-5 weight rods, and 2 tips for 5-7 weight rods).

The **FOLD N HOLD** is a father & son project that was developed from a napkin sketch on the way home from a fishing trip. 25% of profits from this project will be donated to support local fly fishing organizations and fisheries.
