

FOLD N HOLD

Your Fly Rod's New Best Travel Buddy – safe and simple transport method for your fully rigged fly rod!

The **FOLD N HOLD** is the quickest and easiest way to transport and store your fully rigged fly rod in a compact, half-length configuration - so you don't have to cut off your fly and break down your rod when bushwhacking to your next spot or packing up to get back in the car.

The **FOLD N HOLD** is designed for fully rigged 3–7 weight fly rods and includes interchangeable, replaceable tips - two each in sizes S, M, and L – to optimize the fit to your rod.

The **FOLD N HOLD** is 3D-printed and assembled in the Pacific Northwest using carbon fiber-reinforced PETG composite for strength and durability.

The **FOLD N HOLD** is a father-and-son project born from a napkin sketch on the drive home from a fishing trip. Twenty-five percent of profits are donated to support non-profit fly-fishing organizations and fisheries.
